Professional Summary

Flutter Developer with 3+ years of experience developing and maintaining cross-platform applications using Flutter and Dart. Strong hands-on experience with Riverpod state management, REST API integration using Dio/HTTP, responsive UI/UX development, testing, debugging, performance optimization, Git, and CI/CD workflows. Experienced in production applications across Fintech, E-commerce, and business domains, with working knowledge of BLoC state management.

Experience

Flutter Developer / Analyst Programmer L2

KGC Infotech Pvt. Ltd. (Zyro)

Jul 2023 – Present

Noida, Uttar Pradesh

Key Applications: Zyro (Merchant Onboarding & Merchant App), Shopaver (E-commerce & POS), BPCL Delivery App, ZPay (Fintech), TPApp, and Gold & Silver Investment App.

- Developed and deployed 10+ Flutter applications using Flutter and Dart, reducing average load time by **25%** and improving Google Play rating from **3.9 to 4.5**.
- Engineered modular state management architecture using **Riverpod**, cutting feature development time by **20%**.
- Integrated 50+ **REST APIs** using Dio/HTTP, lowering API response latency by **18%** and improving data synchronization reliability.
- Implemented responsive and adaptive UI for **mobile, tablet, and web**, improving cross-device usability and mobile user retention by **15%**.
- Performed application **testing, debugging, and performance optimization** across development and production applications.
- Managed code repositories using **Git** and followed version control best practices for collaborative development.
- Secured API communications with AES encryption and integrated **Firebase Cloud Messaging and OneSignal**, increasing monthly active users by **22%**.
- Managed **Flutter build and release workflows** and contributed to **CI/CD processes** for application build and deployment.

Technical Skills

Languages & Frameworks: — Dart, Flutter

State Management: — Riverpod, BLoC (Basic)

Architecture & Development: — Clean Architecture, Repository Pattern, Modular Architecture, Dependency Injection

Networking & APIs: — Dio, HTTP, RESTful APIs, JSON, API Integration

UI/UX: — Responsive UI, Adaptive Layouts, Material Design, Mobile, Tablet & Web UI, Cross-Platform Development

Testing & Debugging: — Application Debugging, API Testing, Performance Optimization, Cross-Platform Testing

Security: — API Encryption/Decryption, Secure API Communication

Notifications: — Firebase Cloud Messaging, OneSignal

Version Control & Development Tools: — Git, GitHub, Android Studio, VS Code

Build & Deployment: — Flutter Build & Release, CI/CD Workflows

Projects

Attendance Using Face Recognition

Flutter, Python, Flask, MySQL, OpenCV

- Developed a responsive **Flutter UI** for a face recognition-based attendance system, integrating with a **Python Flask backend** and leveraging **OpenCV and MySQL** to automate attendance tracking, reduce manual work by **80%**, and support **100+ students**.

Education

United College of Engineering & Research (UCER)

Bachelor of Technology in Computer Science

July 2019 – June 2023

Prayagraj, UP
